This listing of claims will replace all prior versions, and listings, of claims in the application:

## Listing of Claims:

Claims 1-7 (canceled).

Claim 8 (currently amended): A method for identifying an agent that destabilizes lysosomes and increases oncogenic protein degradation comprising contacting a cell that expresses PML/RAR $\alpha$  with an <u>effective amount of an</u> agent, wherein an effective amount of said agent is a concentration that is clinically useful, and detecting whether said agent

- i) destabilizes lysosomes of the cell, as determined by vital staining of lysosomes or release of lysosomal proteins into the cytosol; and
- ii) increases lysosomal-dependent PML/RAR $\alpha$  protein degradation, thereby identifying an agent that destabilizes lysosomes and increases oncogenic protein degradation.
